Summary

I am Arthur Espartinez, 25 years old, a full stack developer from the Philippines. I am a registered Mechanical Engineer but decided for a career shift because coding has always been one of my passion. That's why I decided to take an intensive coding bootcamp to further hone my skills.

I would like to contribute to your organization as a full-stack developer, leveraging my ability to develop E-commerce web applications using readily available-web applications. With my passion for learning, I will be able to take part in empowering your team with my newly found coding experience.

Experience

Student

Zuitt - Coding Bootcamp Philippines

Aug 2021 - Sep 2021 (2 months)
